

**IF TALKING TO YOUR KIDS ABOUT METH
DOESN'T WORK, PUT THIS IN THEIR ROOM.**

IF YOU TAKE METH, THIS IS WHAT CAN HAPPEN: INCREASED
BLOOD PRESSURE, HYPERTHERMIA, CONVULSIONS,
ADDICTION, INSOMNIA, NAUSEA AND
VOMITING, DIARRHEA, FORGETTING TO EAT AND
SLEEP, WEIGHT LOSS, MALNUTRITION, PARANOIA,
HALLUCINATIONS STROKE.
AND YES, DEATH. METH KILLS.
